

Xoriant TIBCO® Practice

Xoriant understands that businesses today require increasing number of their existing multi-vendor applications, databases and decision support systems are connected in their enterprise middleware/ SOA environment. In many cases, the business architecture already exists and clients demand hands-on technical implementers who can work with the existing enterprise architecture, implement detailed technical specifications and seamlessly execute the integration.

XORIENT Middleware/SOA Expertise: Xoriant has the right expertise and relevant domain experience to deliver and support state-of-the-art SOA, BPM, and BO environments that enable customers to leverage middleware technologies for their business needs.

XORIENT + TIBCO®: Xoriant is an Engineering Partner for TIBCO in long-standing, and is uniquely positioned to bring deep-domain TIBCO expertise that has been tested in large and complex implementations.

XORIENT TIBCO Platform Expertise: Our team of trained TIBCO professionals have worked in numerous verticals over the past decade, delivering complex integration solutions for many large and medium enterprises with multiple ERP environments. These deliveries include:

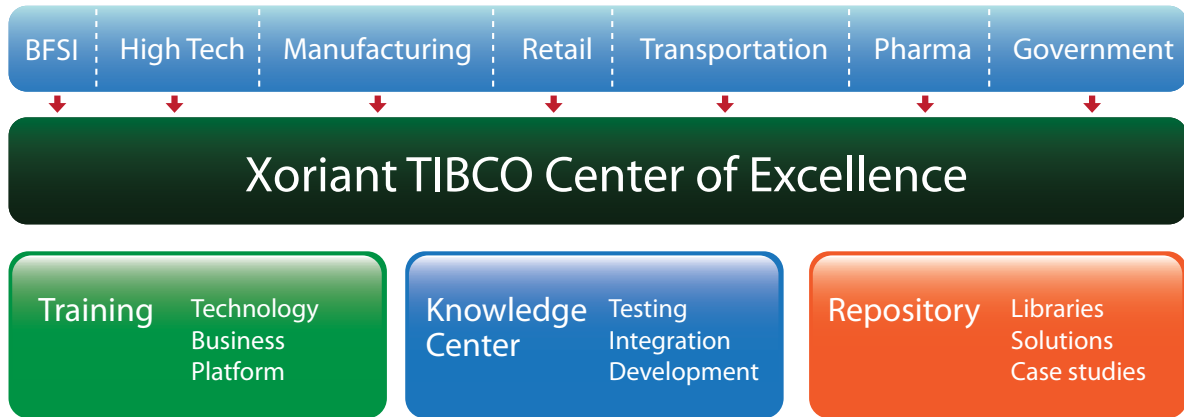

“With Xoriant, we could leverage the best of TIBCO platform to seamlessly bring all our ERP and CRM environments into a single ESB architecture, helping our multiple business units get the best of real-time actionable information.”

Vice President, Applications, of a large semiconductor company

TIBCO Center of Excellence: We have implemented a TIBCO Center of Excellence in our India delivery center to create, share, and maintain a rich knowledge base on TIBCO products, solutions, and services. In the past decade and more, we have built up a strong team of over 50 trained professionals who lead our customer delivery in global locations.

TIBCO Services and Solutions: Xoriant leverages a hybrid delivery model that is ideal for onsite consulting requirements, offsite development, and offshore maintenance, helping clients economize without compromise on project scope, time, and resources. Our middleware/SOA services and solutions include:

- BPM process consulting: modeling and deployment of clients new business processes into existing BPM framework
- BPM business rules harvesting and analysis: develop framework for specifying, harvesting, recording and improving business rules
- SOA Adoption and migration: help develop a migration strategy from a legacy enterprise IT infrastructure to an SOA-based architecture
- TIBCO Business Works performance tuning and quality assurance using QA Case suite
- Performance tuning and reliability enhancements of middleware and SOA infrastructure

Technology Integration Services: Custom packaging, roll outs, upgrade services, migration services and quality assurance

Adapter Framework Services: Develop custom adapters and protocol transformers for EAI implementations. Integrate custom systems and databases into the EAI environment

Monitoring and Sustaining Engineering Services: Framework for monitoring to manage distributed application and information sources. Sustenance of technology and application environment through multiple software releases of different components

About Xoriant: As a leading Systems Integration and Product Development Services firm based in the Silicon Valley, Xoriant Corporation works with both Fortune 1000 and venture-backed companies in providing a continuum of business-driven solutions. These services are tailored to empower both creators and users of software to be agile and to realize maximum ROI from their technology investments.
