

XORIAN PES FOR EAM CLIENT CASE STUDY

CLIENT OVERVIEW

Our client is one of the world's largest providers of business software, with approximately \$2.1 billion in revenue, and the 10th largest software company in the world. The client's Enterprise Asset Management (EAM) powers over 80% of the Fortune 500 enterprises.

KEY REQUIREMENTS

- The entire product had to be re-architected to be flexible, scalable and secure.
- From a multi-vendor environment, the client wanted to consolidated the vendor base to a single company, based on past performance.

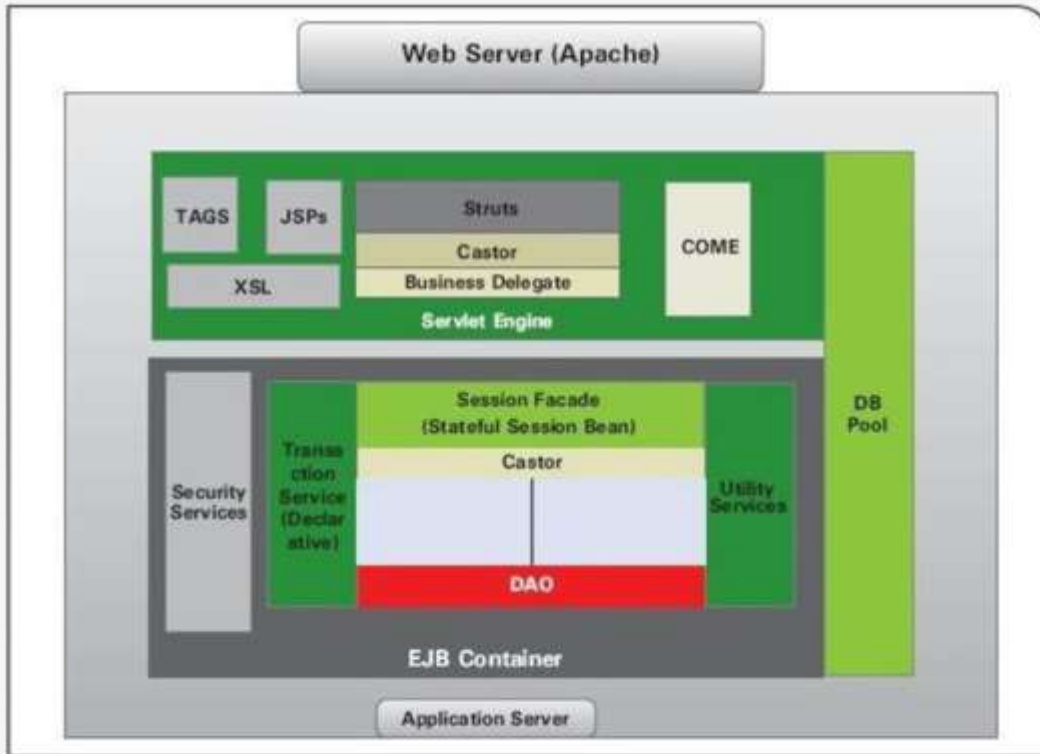

KEY CONTRIBUTIONS

- We quickly adapted to client's framework, product architecture and engineering practices.
- Using Webex sessions, we organized intense Computer-Based Training (CBT) to gain product and framework knowledge.
- We successfully contributed in release of new Business edition targeted at Tier 3 / Tier 4 customers.
- We created and enhanced development guide to reduce product learning curve for future development.
- Our core team also developed a code generation (CG) utility that induced standardization and reduced development time.
- For better collaboration and retaining high team spirit, we started an onsite rotation policy wherein 2 team members work for 4 months onsite.

KEY BENEFITS

- We successfully contributed in 4 major releases
- The client shifted from Multivendor to Single-vendor (Xoriant)
- The new team member is productive in 4 weeks (Improved from 6 weeks)
- Productivity improved by 15% (use of Code generator utility)
- Our enhanced guide & CG Utility were recognized as best practices

HIGH LEVEL ARCHITECTURE

TECHNOLOGY STACK

- XSL
- JSP
- Struts
- Apache web server
