xoriant
Success Story

Smarter Procurement Platform for a Global Software Leader

By integrating automation and intelligence into procurement, we helped transform a traditionally complex process into a strategic advantage.

With a strong presence across industries, our client provides cutting-edge technology to drive digital transformation, enhance efficiency, and enable data-driven decision-making. Trusted by organizations worldwide, the client's solutions empower enterprises to streamline complex processes and stay agile in a rapidly evolving business landscape.

Challenges

For large enterprises, procurement is no simple task. Managing suppliers, sourcing direct materials, and ensuring compliance with procurement guidelines requires a streamlined, digital-first approach.

Legacy systems slowed supplier management, invoicing, and contracts.

Limited insights for buyers and a clunky experience for employees.

Manual processes led to delays and inconsistent product performance.

Collaboration

To bring this vision to life, Xoriant developed a comprehensive web-based procurement marketplace tailored to the client's needs. Here's how we made it happen:

Designed
Robust lifecycle management, from onboarding to performance tracking—all in one platform.

Implemented
Intelligent guided buying and smart sourcing—ensuring policy compliance better supplier, material, and cost insights.

Streamlined
Contract management with centralized contract creation, tracking, and renewals for better control and compliance.

Enabled
A core procurement experience with built-in PO and invoice generation to simplify workflows and ensure accuracy.

Automated
Invoicing to auto-generate invoices and reduce errors and speed up financial processes.

Configured
Proactive supplier and market risk analysis with risk insights to minimize disruptions.

Business Value

Enabled
Centralized, intelligent oversight of supplier relationships with seamless supplier management:

Optimized
Sourcing and integrated data-driven tools for smarter, faster procurement decisions

Automated
Compliance and reduced manual effort with built-in policy adherence and streamlined workflows.
