XORIANT

Drive Edge-to-Cloud Transformation

Winning with IOT!

Custom Workshop and Pilot Investment Opportunity

Go beyond simple data exchange to building intelligent environments that model your vision.

Xoriant's **X·CELERATE IoT** solution helps you rapidly deploy an end-to end IoT solution that solves your specific business challenges, driving efficiency and increasing productivity with Azure IOT.

Build a secure, scalable and compliant IOT environment leveraging Azure IOT and accelerate time to market.

Xoriant and Microsoft make 'insights at your fingertips' a reality, with hyper customized architecture and intuitive user experience.

IOT for Retail	IOT for Manufacturing	IOT for Supply Chain
Understand customer behavior, in real time with cognitive video analysis, integrated with your ERP data to create better customer experiences.	Achieve smart manufacturing by correlating data from multiple machines, sensors, and systems to better understand and correct quality problems.	Integrate data from sensors and enterprise systems to monitor your supply chain metrics including temperature, location, and damage monitoring to predict disruptions.

1 **Free Ideation Session** to understand what is possible within your industry, and to qualify for Step-2
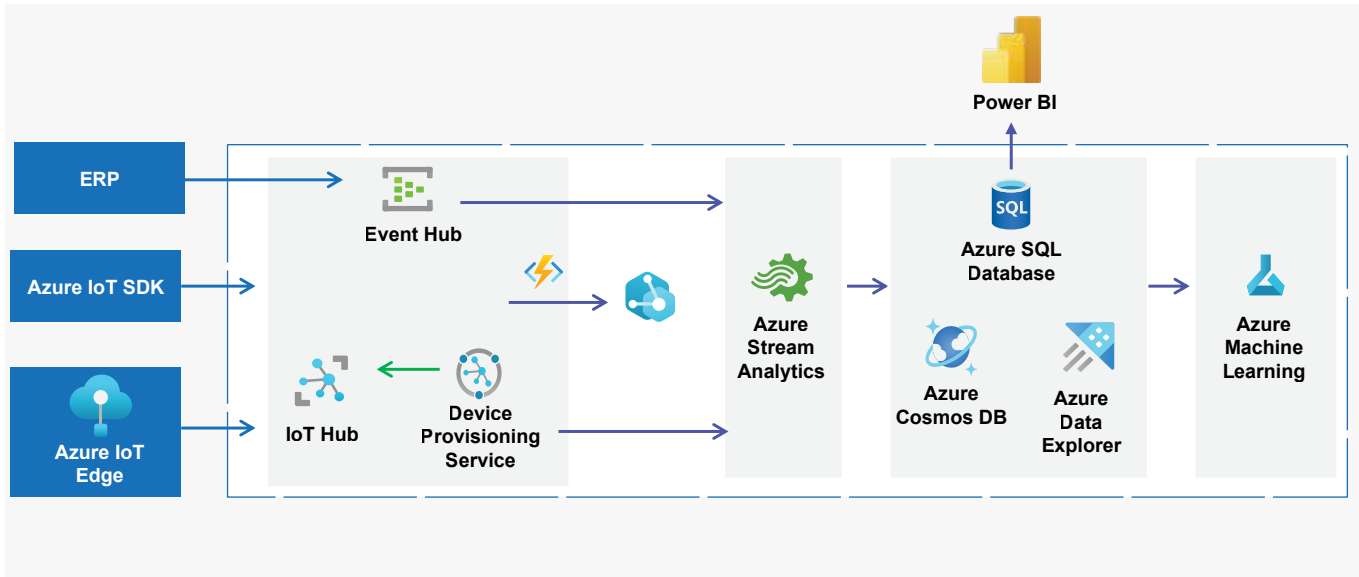

2 **No-Cost Discovery Workshop** tuned to your specific business needs

3 **Additional investment for Production Pilot** may be available after a successful Discovery Workshop
