

Winning with AI Powering GCP Transformation With Gemini + Vertex

Accelerate Your AI Journey with Xoriant's Winning with AI offering!

Let Xoriant’s team of AI experts help you identify, develop and execute business impacting AI Use Cases – from ideation to production – unlocking the full potential of Generative AI!

- Most AI platforms promise intelligence. Few deliver outcomes.
- Google Cloud Gemini + Vertex AI turn data into decisions fast.
- Generate, predict, and deploy from one unified platform, bringing AI directly into marketing, operations, engineering, and analytics.
- From multimodal AI and intelligent copilots to end-to-end model training, deployment, and MLOps, everything works together—secure, scalable, and built for real-world execution.

Xoriant Solution Areas on GCP

Optimize Cloud Operations
Governance-led FinOps, run through Google Cloud's FinOps Hub for efficient, accountable cloud spend

Advance Autonomy
Gemini Cloud Assist and agent-driven automation, paired with our mentorship, toward self-healing operations

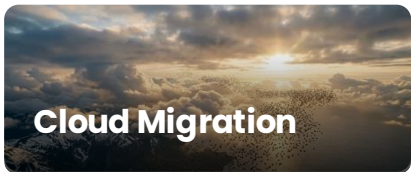

24/7 Coverage and Visibility
AI-assisted operations combined with constant coverage and on-demand L3 expertise

Strengthen Threat Detection
Enterprise-wide detection and monitoring powered by Security Command Center, across all environments

Overcome Visibility Gaps
Eliminate blind spots across identity, workloads, findings, and network threats, all in a single pane of glass

Faster Incident Response
Real-time visibility and response, backed by Google SecOps and Mandiant-grade threat intelligence

Secure Cloud Foundation
Enterprise-grade landing zones with built-in security and compliance, and optional automated infrastructure deployment

Minimize Operational Risk
Phased migrations guided by Migration Center assessments, minimizing business disruption at every wave

Prepare for Modernization
A GCP foundation built to put Gemini and agentic AI to work, not just a destination for your workloads

Start with High-Value, Zero Cost Consulting

Ideation: Kickstart your AI initiative with our educational workshops:

- Explore industry-specific AI use cases
- Identify quick wins for immediate impact

Discovery: Once you select initial use case(s), we'll guide you to:

- Analyze your current data
- Examine technical architecture
- Define specific implementation requirements

Solution: Deliverable = Comprehensive Solution Overview including:

- Detailed end-to-end technology and implementation plan for identified use case(s)
- Term, effort + implementation and ongoing cloud consumption + support costs

Everything you need to get started!
