

NLPro

Text Analytics Framework

In today's information driven world, enterprises are faced with ever-increasing volumes of data from varied sources such as documents, emails and social channels. Unlocking intelligence from this unstructured data is daunting, but critical for businesses in a breadth of areas from patent searches and fraud detection to law enforcement and risk assessment.

Xoriant's NLPro framework helps organizations transform unstructured text into usable insights.

The major benefit of using NLPro is that it learns from you! The training module allows you to give new feedback that is then incorporated the next time NLPro analyzes text. Another key benefit is the framework's easy integration with varied data sources (social channels, news sources, emails, etc.) and other subsystems such as OCR, file shares, ftp servers and single-sign on solutions.

Key Features

Rules Engine Allows user to define custom rules/logic for input data recognition, concept extraction, etc.

Train Module Used to correct false positives/incorrect data and detect attributes by providing feedback to the machine learning model through combination of new rules and templates

Templates Predefined templates for common business documents, allows user to save time and avoid errors considerably

Key Benefits

- ▶ Continuously improves accuracy and efficiency through machine learning
- ▶ Dramatically reduces manual effort required to process text based information
- ▶ Reduces errors caused by manual processing
- ▶ Provides new insights through analytics of text based information
- ▶ Highly customizable to your specific business process

Sample Use Cases

 Unstructured Document Review	 Risk Identification	 Regulatory Compliance
<ul style="list-style-type: none"> ▶ Identify all valuable information hidden deep within complex reports, documents, etc. via the framework's natural language processing ▶ Avoid manual errors and long process times 	<ul style="list-style-type: none"> ▶ Scan and extract pre-defined risk parameters from the enormous financial, contract and other documents ▶ Guarantee high data accuracy while reducing turnaround and processing time 	<ul style="list-style-type: none"> ▶ Validate data attributes against predefined regulatory and compliance lists ▶ Improve the validation efficiency with each process via the framework's self learning feedback mechanism

NLPro in Action

The bank employed Xoriant's NLPro solution to process hundreds of complex transaction documents, validating it against the Specially Designated Nationals (SDN) lists to help meet OFAC compliance more efficiently. (OFAC is mandatory regulatory requirement to ensure transactions are not originating from entities that are subject to sanctions, associated with terror organizations, etc.) NLPro helped identify high risk transactions in 70% less time compared to the bank's prior processing time.

NLPro framework helped the risk assessment organization identify contractual terms and obligations from complex and large contract documents by quick detection of key clauses, dates, etc. This helped them to not miss on risk parameters or attributes hidden in the several annexure documents that came with the contract documents. This enabled the firm process to large documents quickly with fewer review cycles, improving efficiency by 40%.

A large multinational bank reduced the time to detect high risk transactions by

70%

US based consulting organization improves contract processing efficiency by

40% through early detection of contractual entities and obligations

Xoriant Corporation is a software product engineering and technology services company based in Silicon Valley with offices in the United States, Europe and Asia. At Xoriant, our expertise in emerging technologies drives our growth. We deliver innovative enterprise solutions and engineering services through our technology practices in Digital, Cloud, Analytics, DevOps and Security. Xoriant has deep client relationships spanning over 25 years with various clients ranging from startups to Fortune 100 companies. For more information, please visit www.xoriant.com
