XORIANT-MICROSOFT

DELIVERS CLOUD INFRASTRUCTURE AND SECURITY SOLUTIONS

For global enterprises and software product companies to migrate, secure and optimize for the cloud

Enabling **Azure Cloud** Adoption With **Security** and Optimized **Infrastructure**

Xoriant provides expertise in building and managing cloud-friendly software with focus on Enablement and Migration, Security, Optimization and Operational Efficiency leveraging AI at its core

Migrate

- On-Prem to cloud
- Hybrid model
- One cloud to another
- Multi-cloud model
- App modernization
- Re-platform
- Product to platform

Secure

- Threat/Risk management and mitigation
- Security posture management
- DevSecOps
- Compliance management

Optimize

- Infrastructure monitoring
- Observability
- Site Reliability Engineering (SRE)
- Cloud cost optimization

Azure Components for Digital Transformation

Azure Network (VNET), Azure Storage, Azure VMs, AKS, Azure Security Tools etc.

Automate with Jenkins, or Bamboo, or Azure DevOps pipeline in-use

xoriant **Microsoft**

Making the most of Azure cloud

Xoriant brings legacy product companies and enterprises up to speed with **Pre-built Frameworks and Templates** that minimize time to adoption

Xoriant supports digital-born product companies and enterprises to **reach the next level** in their Cloud and Security journey

With our Azure Cloud, Infrastructure and Security solutions, you can:

✓ **Manage**, govern, and secure IT resources across platforms

✓ **Build** and deploy a truly consistent app experience everywhere in your hybrid cloud

✓ **Set up** unified hybrid security management and advanced threat protection

✓ **Migrate**, manage, and analyze data across your digital estate seamlessly

✓ **Run** Azure data services like Evergreen SQL and elastic scale where you need them

Microsoft Focus Areas

Azure Cloud Infrastructure

- Migrate Windows to SQL Server, migrate Linux and OSS DBs

- Modernize VDI to Azure Virtual Desktop, migrate to Azure VMware solution, drive DevOps adoption

- Modernize .Net and Java apps with PaaS, low code and managed databases

- Build cloud-native apps with Kubernetes, serverless and managed databases

Azure Cloud Infrastructure Optimization and Security

- Defender for IoT

- Network security (DDoS, WAF, Bastion, Firewall)

- Sentinel

- Secure SAP on Azure

- Monitoring (log analytics, monitor, insights & analytics)

- Defender for Cloud

- Security Policy and Security Center

M365 Cloud Security

- M365 E3 + M365 Security (EMS)
- M365 E5
- M365 Security (EMS)
- Azure AD P1/P2
- M365 DLP
- Advanced Identity Protection
