

Amplify Business Outcomes with **CloudIO**

A dynamic platform for swift and advanced app modernization

Experience enhanced application development with Xoriant's **CloudIO Accelerator**, powered by AWS. Our intuitive platform enables efficient customization, from designing interfaces to defining functionalities, ensuring a streamlined development process with minimal coding. Realize your vision effortlessly and achieve outstanding results.

Empower your Business with:

50% Reduced time to market

- ▶ Collaboration with developers and business users boosts productivity by **30%**
- ▶ Enhanced collaboration reduces rework by **25%**, improving deliverable accuracy
- ▶ CloudIO accelerates development, reducing time to market by **50%**

40% Cost Savings

- ▶ Reduced development time and maintenance effort results in cost savings
- ▶ Efficient operations with optimal hardware and software configurations, eliminating costly servers and infrastructure investments.

25% Improved User Experience

- ▶ Users experience a **25%** increase in productivity due to CloudIO's user-friendly interface and streamlined workflows.
- ▶ User satisfaction scores consistently average above **90%**, demonstrating CloudIO's effectiveness in providing an excellent user experience.

Future of Business Transformation with CloudIO

CloudIO speaks of business value! It is a flexible, structured, and scalable foundation developed for enterprises like yours to speed-up application development, unify data from existing systems, and deliver rich digital experiences. With CloudIO, enterprises can achieve:

Streamlined Workflows

- ▶ Simplify complex business processes with CloudIO's workflow capabilities and ensure efficiency

Optimized IT Investments

- ▶ Consolidate data from various systems, maximizes the value of your existing IT investments.

Seamless Integration

- ▶ CloudIO seamlessly integrates with other enterprise systems and services, whether on the cloud or on-premise.

Customer Imaginations Realized with CloudIO

Digital | Low Code Applications:

A digital services company uses CloudIO's low-code prowess to transform Excel-based apps into user-friendly web applications using swift digitization, seamless integration, and enhanced scalability that results in an **85% error reduction in project planning, improved collaboration, and a 40% time-saving data entry process.**

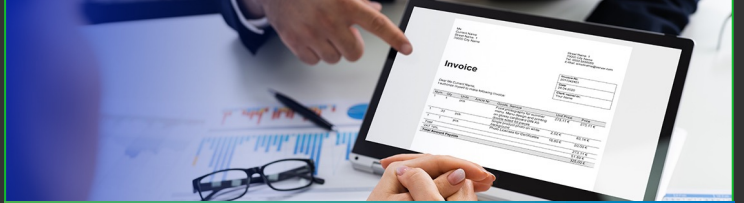

Healthcare | Workflow Orchestration:

A leading medical device company uses CloudIO's workflow orchestration engine to tackle master data challenges. Seamlessly connecting applications, the solution ensures synchronized data, identifies inconsistencies with red lining changes, and operates on live data connectors. This led to a **95% accuracy boost, 50% operational efficiency gains, and surpassing compliance requirements.**

Retail | Inventory Management | ERP Integration:

A prominent grocery chain faced leader with 750+ users across 45 warehouses use CloudIO's custom built applications using low code to integrate their ERP systems, fostering **90% improved data accuracy, 30% boost in decision-making and 50% reduction in labor costs.**

ISV | Supplier Management | Invoice Processing:

A social media giant streamlines supplier onboarding and maintenance with efficient data management using CloudIO's Supplier Connect realizing **35% surge in supplier engagement.**

3 Steps to Get Started!

Ideation:

- 1 Industry-specific ideation session(s) with demonstration

Discovery:

- 2 Discovery workshop(s) covering your business and technical requirements

Deliverable:

- 3 Solution overview and proposal, including scope, technologies/architecture, term + cost to implement

After these 3 steps, if you would like to move forward with a production pilot, additional investment potentially available from Xoriant and AWS to help launch a quick start!
