

# Hitchhiker's Guide to Product Modernization

Helping You Enable Your Clients' Digital Transformation

## Why Xoriant for Product Modernization?

- **Proven Expertise at Every Stage of the Journey**  
We have proven our technical and service capabilities in modernization engagements ranging from multi-year end-to-end initiatives to incremental projects – from architecting the strategy and technology selection, to rebuilding platforms, to supporting end-of life products.
- **Extensive Experience with Technology Ecosystems**  
The true promise of the cloud lies in the interconnectivity it enables. We have the ecosystem expertise and proven experience building extensions, testing them and getting them certified by key platforms and applications, so you can realize that promise.
- **Key Technology Partnerships**  
Backed by our strong network of technology players, cutting edge start-ups and platform partners complementing our broad expertise across six leading technology practice areas, you can have confidence deploying next-generation products.
- **Co-Ideation & Rapid Prototyping Approach**  
Our proof of concept approach speeds time to market and makes more efficient use of your financial resources. Through our Innovation Lab we're able to experiment and test before implementation, optimizing technology fit and minimizing disruption.

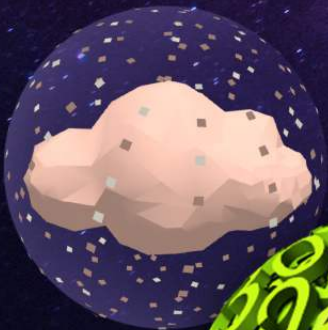

# Our Experience Across Product Modernization

## Lamuella

### Cloud Enablement

Food Quality Assurance Management Solutions Provider

Increased client customer base by 20% with cloud and mobile enablement through partial refactoring and re-architecture of the hosted compliance solution.

## Santragnus V

### Analytics Enablement

Telecom Enterprise Software Provider

Improved mobile marketing effectiveness based on real time insights of consumer behavior and marketing intelligence through predictive modelling.

## Argabuthon

### Architecture Transformation

Leading Mortgage Origination Solutions Provider

Accelerated mortgage processing speed while reducing costs by improving collaboration and visibility across various stakeholders, through re-architecting the monolithic legacy desktop application into a SOA and microservices based SaaS platform.

## Damogran

### Technology Upgrade

Global Financial firm

Improved data import speed by 70% with development of new MDM solution, while migrating relational database to polyglot (NoSQL) persistence.

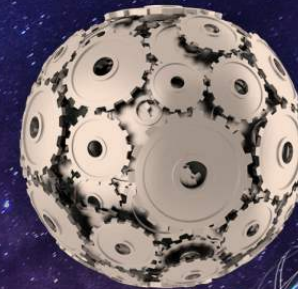

## Arcturus

### Automation

Network Crisis Communications Solutions Provider

Reduced manual testing efforts by 70% and bug leakage by 40% by developing a robust automation framework that supports parallel execution of the test suite across multiple systems.

## Magrathea

### UX & Accessibility

Enterprise Operations Cognitive Solutions Provider

Raised productivity by 30% by modernization the user interface via multi-language voice channel enablement.
